**Immigrant Women's Health Service**  
*Invites parents to*

# Learning language Is Fun!

*Presented by*  
**Stephanie Law and Erica Yu**  
 Speech Pathologists, Fairfield City Council, Early Support Team,

Our ability to verbally express our wants and needs is a fundamental part of our being. As your children's first teachers, parents have a vital role in stimulating the speech and language development of their children.

- This session will provide general information for parents of children aged under 5 on:
- Normal speech and language development
- Importance of talking and playing with children
- Practical ideas on ways to play with your children to stimulate language development
- What parents can do if they have concerns
- Bilingualism and language development

Bookings are essential and places are strictly limited. Please call to book your place.

*Please note that the information provided is of a general nature and the presenter cannot give advice about specific cases. The session may be useful to parents whose children are developing typically and who may have a communication disorder.*

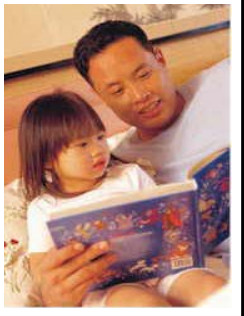

*A Vietnamese and Khmer community worker will be available to interpret during the workshop.*

**CHILD MINDING** is available for a small number of children. Please book a place for your child when you book your place.
